## 2. General information about your organisation

### How your organisation is structured:

- Names of board members and function:

Margaret Wanjiru -secretary

Jemmimah Mweu - project Director

Agatha Munavu -Treasure

Celestine Nzioka- Member

Noreen Achieng -Member

Elizabeth Mutavi-Member

Asulma. O. Roche- Member

Angeline Nzisa-Member

Domitila Syekonyo-Member

Mary Muthoni-Member

Rabbech Akeyo-Member

Gladys Bokea-Member

Florence Mwikali -Member

- Name of director: Jemmimah Mweu

- Number of paid staff and volunteers

2 paid and 10 volunteers

- Formal registration type (foundation, association etc.)

Community based organization

- Formal Registration number: DGSD/NWD/5/4/09(730)

## 3. The PROJECT plan

### 3a) The context?

Shammah Childrens Centre is a community based organization which is located in Kianda Village, Kibera one of the biggest slums of Nairobi Kenya. The centre has been actively working with 400 households of Kianda village who are stricken by poverty and very vulnerable. The centre is normally providing a feeding programme for the children , primary education and training life skills like school gardening, poultry keeping etc. which is leading to a small income and vocational training like computer skills and sewing, which should lead to job creation.

The challenge since the lockdown is that the children do not get any longer their food and education in the school and their caregivers are not going to work to sustain themselves because most of the organizations were shut down and most of them are casual workers who work from hand to mouth. People cannot go out to work which includes those who could wash cars, do domestic work, gardening and sell fruit and vegetables. Economic activity for most people in the slum has stopped totally and others were send on unpaid leave.

We strongly want to support the 400 households with whom we always have worked and who are very needy and who have large families depending on them.

Shammah has 13 board members and 12 volunteers who oversee the smooth learning in the institution as a whole and they are the same people who will protect and assist the people in the community.

Corona effects have brought everything at stand still, most people are not working, children are not fed well and they are not learning and too much idleness can cause many indiscipline cases (eg) drug abuse among other behaviours.

### 3b) Working in difficult times and organizing the food distribution

Corona virus has interfered with the daily activities when the government ordered all the schools in Nairobi to be closed with immediate effect, all our activities had to stop so as to adhere to the government's order so as to curb the spread of corona virus. The precaution we have taken is to allow our staff and learners to stay at home according to the government's order.

Our organization has been able to work in difficult situations like during elections there is a lot of chaos in the slum and we continue with our activities where by learners are brought to school by their parents or care givers in the morning and picked in the evening however when situation is unbearable we advice the caregivers to stay with the children for their safety at home. Like now due to corona virus children are staying with their parents at home because most organizations and work places are closed apart from a few shops that are operational however we have never experienced such before.

The 13 board members of Shammah together with the 12 volunteers and the food supplier Japuoyo wholesalers and the stationary shop Ensamo will organize the food and education programme in an orderly way respecting social distancing in close cooperation with the elders representing the community. We have big halls where we can organize the distribution.

### 3c) The direct beneficiaries of this project?

The target group consist of 400 households which contain children and their families whereby one family is estimated to have 8 members of one house hold.

The problems we are going to tackle to protect our target group are as follows provide feeding programme to the house holds not to die of hunger during this season whereby most people are jobless, to continue educating our learners through doing distance learning by providing assignments to be done at their homes so as to observe social distancing and later return the assignment to the teachers for marking so as to keep them busy to avoid idleness which can lead to bad behaviours. Promote hygienic practices by providing soaps and sanitizers so as to promote good hygiene which is now the key to fight spread of corona virus.

Shammah centre is located in Kianda village which has more than 1000 house holds but we have been working with 400 households which are the most vulnerable of the entire group. That is why it is essential to work with them during this pandemic season.

### 3d) People who will benefit directly from this project.

	Direct beneficiaries (concrete number)	Indirect beneficiaries (estimated number)
Target group 1	400 House holds *8=3200 People	2 suppliers
Multipliers (those who distribute the services to the target group)	25 teachers and board members	

### 3e) The goal /goals of the project

<b>Goal 1</b>	To provide feeding programme
<b>Goal 2</b>	To provide education
<b>Goal 3</b>	To inform and promote hygienic rules.

### 3f) The main activities of this project

	<b>Goal 1 Feeding Programme</b>	<b>Formulate short the expected Result(s)</b>	<b>Evaluation: how are you going to evaluate this Result(s)?</b>
1.1	Activity1 Purchasing of food stuffs and distribution	We will ensure that all the food stuffs will be distributed to all our 400 households accordingly so as to keep them healthy	By use of registers which will enable us to know if all the households have been ministered.
	<b>Goal 2 Education</b>	<b>Formulate short the expected Result(s)</b>	
2.1	Preparing of Learning materials distribution	Teachers to prepare assignments for the learners to ensure continuity of learning to our learners .	The assignments will be returned at a certain date, and marked.
2.2.			
	<b>Goal 3 Hygiene</b>	<b>Formulate short the expected Result(s)</b>	<b>Evaluation: how are you going to evaluate this Result(s)?</b>
3.1	Purchasing and distributon of soap	All the 400 house will receive soap and hygienic rules which will enable them to observe cleanliness which is key to curb the spread of corona virus	We keep a record of all families what is happening within the households.

### 3g) Management, supervision and implementation of this project

<p>The project will be managed and supervised by the both the board members and the teachers to ensure that all goes well.</p> <p>Food distribution can be of risk because most people are suffering lack in our village but we will be wise while distributing the food whereby we will design a meal card which will be used once by the households which they will use to go and collect their food package in the identified food supplier (Japuoyo salers)hall. The card will be used once and the house hold details will be in the card and at the same time reflecting in the details in the distributing shop.</p> <p>The learning material will be organized in the hall of the Ensamo shop together with board members and teachers.</p> <p>Teachers will give in little group of 10 children the assignments and also collect the assignments in little groups at separate dates and times.</p> <p>To ensure that there is no negative effects we will work with the village elders who ensure there is peace and order in the village and stands in for the government representative.</p>
---

### 3h) Responsible for the implementation of the project activities

<p>- Name: Jemmimah Mweu</p> <p>- Profession and position: Teacher and Director of the project</p>
--

**3j) Planned project start date and end date**Start date: 15<sup>th</sup> of May 2020End date: 30<sup>th</sup> July 2020**3j) Planned duration of your project**

2-3 Months

**3k) Budget**

<b>Project Budget 'Together we will fight Covid-19' WG2020.27.04 Shammah-Kenya</b>		
Name of your currency	kes	
Average exchange rate:	115	
Budget Costs	<b>1.200.000</b>	<b>10433</b>
<b>Activity 1: feeding programme</b>
